DETAILED ACTION

1. Claims 1-6 and 20-23 are pending in this application.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 4-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14-18 and 24 of U.S. Patent No. 6,261,743. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim an antireflective composition coated under a photoresist layer, the antireflective composition comprising a resin binder, an acid or thermal acid generator and a photoacid generator.

4. Claims 1, 5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 5 of U.S. Patent No. 6,410,209.

layer, the antireflective composition comprising a resin binder, an acid or thermal acid generator and a photoacid generator.

5. Claims 1, 5 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 13 of copending Application No. 09/918,399. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim an antireflective composition coated under a photoresist layer, the antireflective composition comprising a resin binder, an acid or thermal acid generator and a photoacid generator.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

6. Claims 1-6 and 20-23 contain allowable subject matter.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach or suggest an antireflective coating composition comprising an acid or thermal acid generator used in combination with a photoacid generator.

Response to Arguments

8. Applicant's arguments with respect to the double patenting rejections over 5,939,236 and 6,262,743 have been fully considered but they are not persuasive. The applicant argues that the present application is a divisional of the cited patents and therefore not available to sustain the rejection. However the present application is not a divisional but a continuation of 6,261,743 which is a continuation of 5,939,236, as stated

Art Unit: 1756

by the applicant in an amendment to the specification filed 11/3/03. The double patenting rejections over these references are therefore valid.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
